# Searching on SpringerLink | Advanced Search

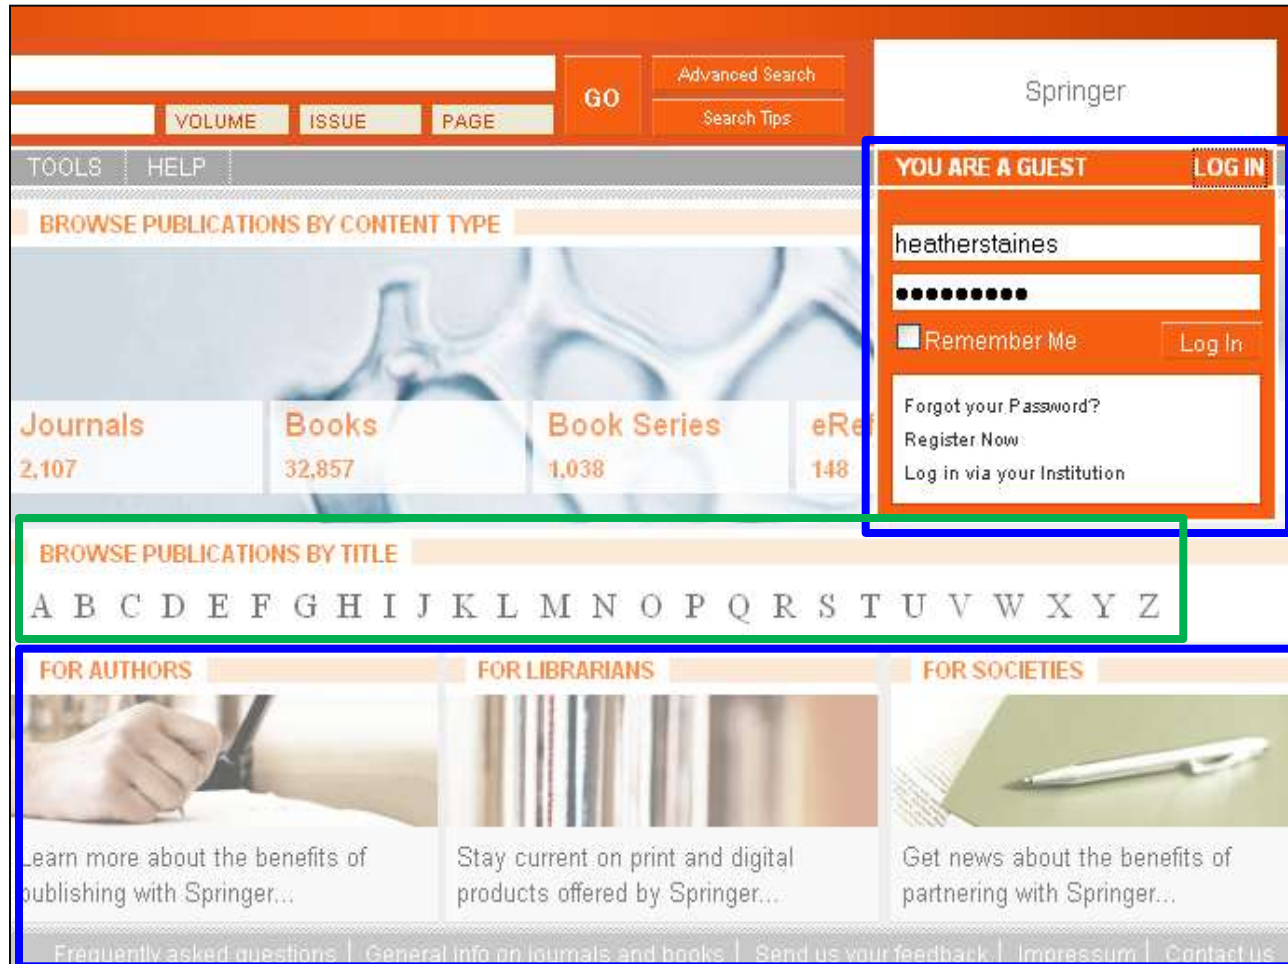

The screenshot shows the SpringerLink Advanced Search page. The interface is primarily orange and white. At the top left is the SpringerLink logo. On the right, there is a search bar with a dropdown menu for 'Advanced Search' (marked with a circled '1'). Below the search bar are several input fields for search criteria: 'DOI', 'AUTHOR', 'EDITOR', 'TITLE & ABSTRACT', and 'TITLE ONLY'. A callout box (marked with a circled '2') points to the 'CITATION' section, which includes a large text box for 'PUBLICATION (TITLE, DOI, ISSN OR ISBN)' and smaller boxes for 'VOLUME', 'ISSUE', and 'PAGE'. Below this is the 'CATEGORY AND DATE LIMITERS' section, featuring a dropdown for 'All Categories' (marked with a circled '3') and radio buttons for 'ENTIRE RANGE OF PUBLICATION DATES' and 'PUBLICATION DATES BETWEEN'. The 'PUBLICATION DATES BETWEEN' section has input fields for 'START DATE', 'AND', and 'END DATE'. To the right of this is the 'ORDER OF RESULTS' section with three radio button options: 'MOST RELEVANT FIRST' (selected), 'MOST RECENTLY PUBLISHED FIRST', and 'ALPHABETICAL'. A 'GO' button is located at the bottom right. A callout box (marked with a circled '3') points to the 'ORDER OF RESULTS' section.

Search with 'Citation' allows researchers to directly find the content they already know.

The advanced search box drops down from any page

Researchers can now choose in advance how they would like their results to be ordered.

## The Home Page

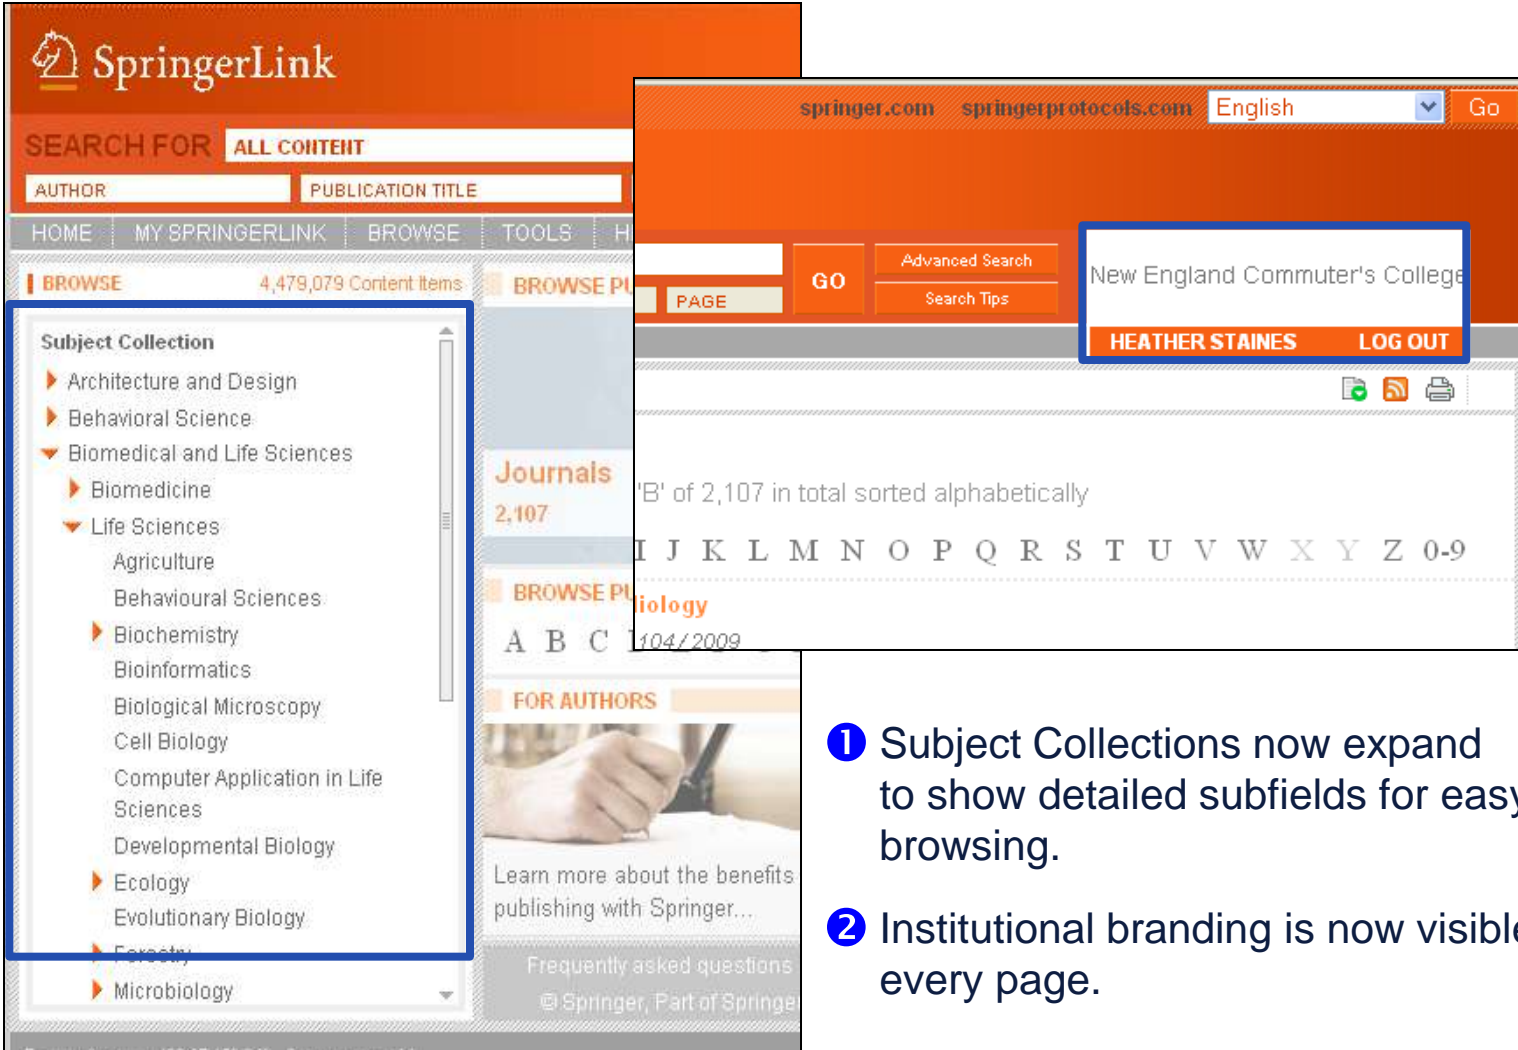

The screenshot shows the Springer home page with several key features highlighted by colored boxes:

- Search Bar:** Located at the top, it includes a search input field, a "GO" button, and links for "Advanced Search" and "Search Tips".
- Navigation:** "TOOLS" and "HELP" links are visible below the search bar.
- Content Type Summary:** A section titled "BROWSE PUBLICATIONS BY CONTENT TYPE" displays statistics for:
 

<b>Journals</b>	<b>Books</b>	<b>Book Series</b>	<b>eReferences</b>
2,107	32,857	1,038	148
- Login Box (Blue Box):** A "YOU ARE A GUEST" notification with a "LOG IN" button. Below it is a login form with the username "heatherstaines", a password field (masked with dots), a "Remember Me" checkbox, and a "Log In" button. Links for "Forgot your Password?", "Register Now", and "Log in via your Institution" are also present.
- A-Z List (Green Box):** A horizontal list of letters from A to Z, used for navigating through publications by title.
- Service Promotions (Blue Box):** Three columns of promotional text:
  - FOR AUTHORS:** "Learn more about the benefits of publishing with Springer..."
  - FOR LIBRARIANS:** "Stay current on print and digital products offered by Springer..."
  - FOR SOCIETIES:** "Get news about the benefits of partnering with Springer..."
- Footer:** A row of links: "Frequently asked questions", "General info on journals and books", "Send us your feedback", "Impressum", and "Contact us".

- 1 Login box available from every page. No need to return to home page to login.
- 2 New A-Z List reduces the need for scrolling.
- 3 Easy access to services on springer.com.

## The Home Page

The screenshot shows the SpringerLink home page. Callout 1 points to the 'Subject Collection' menu on the left, which lists various scientific fields. Callout 2 points to the user profile area at the top right, which displays the user's name 'HEATHER STAINES' and a 'LOG OUT' button. The page also features a search bar, navigation tabs, and a list of journals.

**1** Subject Collections now expand to show detailed subfields for easy browsing.

**2** Institutional branding is now visible on every page.

## Search within Content Type

The screenshot displays the SpringerLink interface. At the top, there are navigation tabs: HOME, MY SPRINGERLINK, BROWSE, TOOLS, and HELP. Below these, there are two main sections: 'Journals' and 'Search Tips'. The 'Search Within Journals' section is highlighted with a blue box and a circled '1'. It contains a search input field and a 'GO' button. Below this, there is a 'Browse Journals' section with a 'Show Filters' link. Underneath, there are three buttons: 'All Titles', 'New Titles', and 'Open Access'. A 'By Subject Collection' section follows, listing various subject areas: Behavioral Science, Biomedical and Life Sciences, Business and Economics, Chemistry and Materials Science, Computer Science, Earth and Environmental Science, Engineering, Humanities, Social Sciences and Law, and Mathematics and Statistics. The main content area on the right is titled 'All Journals' and shows a list of journals starting with 'B'. The first four journals listed are: 'Basic Research in Cardiology', 'Baurechtliche Blätter: bbl', 'Behavior Genetics', and 'Behavioral Ecology and Sociobiology'. Each journal entry includes a small thumbnail image of the journal cover and the volume range.

- 1 Search within Journals or eBooks allows for easy searching within specific content types.

## Journal Features

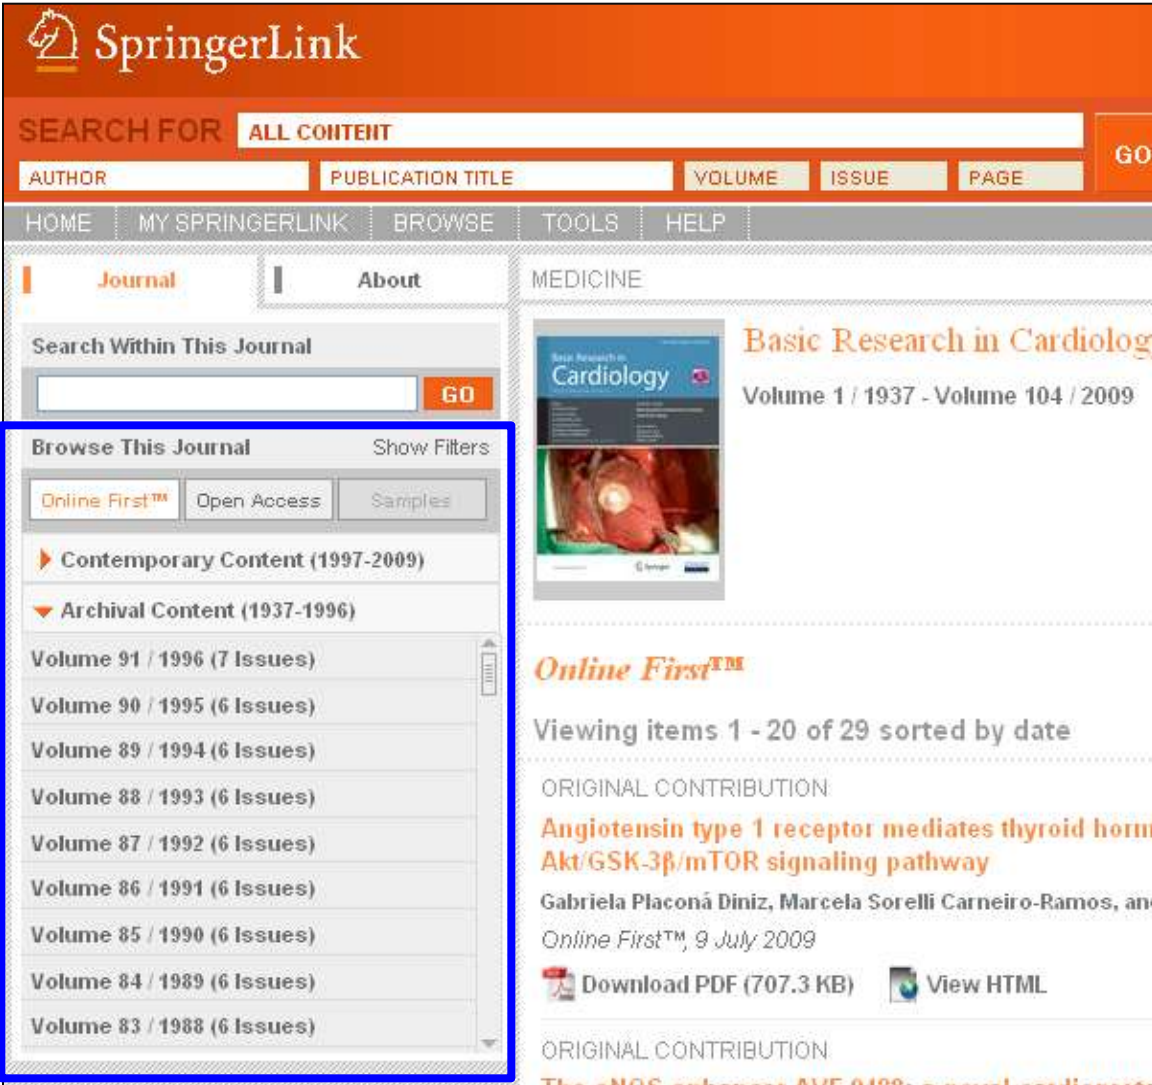

The screenshot shows the 'Journal' tab selected. At the top, there is a search bar labeled 'Search Within This Journal' with a 'GO' button. Below this is a 'Browse This Journal' section with a circled '1' and a 'Show Filters' link. Under 'Browse This Journal', there are three buttons: 'Online First™', 'Open Access' (highlighted with a blue box), and 'Samples'. Below the filters, there is a section for 'Contemporary Content (1997-2009)' with a dropdown arrow. Under this section, 'Volume 104' is expanded, showing a list of issues: 'Number 5 / September 2009', 'Number 4 / July 2009', 'Number 3 / May 2009', 'Number 2 / March 2009', and 'Number 1 / January 2009'. Below that, 'Volume 103' is shown with 'Number 6 / November 2008'.

- 1 Articles can be filtered to show Online First and Open Access articles only.
- 2 The journal history notes indicate any title changes, mergers or title splits.

The screenshot shows the journal history page for 'Basic Research in Cardiology'. At the top, there are navigation links: 'Add to My Items', 'Share this item', and social media icons. The journal title 'Basic Research in Cardiology' is displayed in orange. Below it, the volume range 'Volume 1 / 1937 - Volume 104 / 2009' is shown. A blue box highlights a text block: 'From Volume 1 (1937) to Volume 14 (1944) Issue 5 and from Volume 14 (1948) Issue 6 to Volume 67 (1972), this journal was published as *Archiv für Kreislaufforschung*.' A circled '2' is next to this text. Below the history note, there is a section for 'Open Access' with the text 'Articles available with full open access'. Underneath, it says 'Viewing items 1 - 10 of 14 sorted by date' and provides navigation links: 'First', 'Previous', '1', '2', 'Next'. The first article is listed as 'ORIGINAL CONTRIBUTION' with 'Online First' and 'Open Access' buttons. The article title is 'K201 improves aspects of the contractile performance of human failing myocardium via reduction in Ca<sup>2+</sup> leak from the sarcoplasmic reticulum'.

## Browsing Journal Content

The screenshot shows the SpringerLink interface for the journal 'Basic Research in Cardiology'. The page is divided into several sections:

- Search Bar:** Includes a search box with 'ALL CONTENT' selected, and buttons for 'AUTHOR', 'PUBLICATION TITLE', 'VOLUME', 'ISSUE', and 'PAGE'. A 'GO' button is on the right.
- Navigation:** Links for HOME, MY SPRINGERLINK, BROWSE, TOOLS, and HELP.
- Journal Information:** 'Journal' and 'About' tabs, and the journal title 'Basic Research in Cardiology' with its volume range 'Volume 1 / 1937 - Volume 104 / 2009'.
- Search Within This Journal:** A search box with a 'GO' button.
- Browse This Journal:** A section with 'Show Filters' and buttons for 'Online First™', 'Open Access', and 'Samples'. It contains a list of volumes:
  - ▶ Contemporary Content (1997-2009)
  - ▼ Archival Content (1937-1996)
    - Volume 91 / 1996 (7 Issues)
    - Volume 90 / 1995 (6 Issues)
    - Volume 89 / 1994 (6 Issues)
    - Volume 88 / 1993 (6 Issues)
    - Volume 87 / 1992 (6 Issues)
    - Volume 86 / 1991 (6 Issues)
    - Volume 85 / 1990 (6 Issues)
    - Volume 84 / 1989 (6 Issues)
    - Volume 83 / 1988 (6 Issues)
- Article Preview:** A section titled 'Online First™' showing 'Viewing items 1 - 20 of 29 sorted by date'. The first article is 'ORIGINAL CONTRIBUTION: Angiotensin type 1 receptor mediates thyroid hormone Akt/GSK-3β/mTOR signaling pathway' by Gabriela Placoná Diniz, Marcela Sorelli Carneiro-Ramos, and others, dated 9 July 2009. It includes 'Download PDF (707.3 KB)' and 'View HTML' options.

- 1 All journal content available is instantly visible, including archival content.

### Abstract

Our previous studies have shown that morphine withdrawal induced hyperactivity of cardiac noradrenergic pathways. The purpose of the present study was to evaluate the effects of morphine withdrawal on site-specific tyrosine hydroxylase (TH) phosphorylation in the rat left ventricle. Dependence on morphine was induced by a 7-day s.c. implantation of morphine pellets. Morphine withdrawal was precipitated on day 8 by an injection of naloxone (2 mg/kg, s.c.). TH phosphorylation was determined by quantitative blot immunolabelling using phosphorylation state-specific antibodies. Ninety min after naloxone administration to morphine-dependent rats there was an increase in phospho-Ser40-TH ( $139.0 \pm 13\%$ ,  $P < 0.05$ ) and Ser31-TH ( $135.5 \pm 11\%$ ,  $P < 0.05$ ) in the left ventricle which is associated with both an increase in total TH levels ( $114.4 \pm 4.6\%$ ,  $P < 0.05$ ,  $P < 0.01$ ) and an enhancement of TH activity ( $51.0 \pm 11$  dm/ $\mu$ g protein,  $P < 0.001$ ). When HA-1004 (40 nmol/day), inhibitor of cyclic AMP dependent protein kinase (PKA) was infused, concomitantly with morphine, it diminished the increase in noradrenaline (NA) turnover, total TH expression ( $95.76 \pm 4.1\%$ ,  $P < 0.01$ ) and TH phosphorylation at Ser40 ( $85.5 \pm 11\%$ ,  $P < 0.01$ ) in morphine-withdrawn rats. In addition, we showed that the ability of

**Abstract**

Nitric oxide (NO) has influence on various cellular myocardial energetics. In the present study oxygen isometrically contracting rabbit papillary muscles (P) were exposed to various interventions while maintaining physiological conditions. The NO donor sodium nitroprusside (SNP) (0.1 μM) increased oxygen consumption (V<sub>O2</sub>) and

## Mousing over Related Documents

The screenshot displays the SpringerLink interface. On the left, a sidebar titled "View Related Documents" (marked with a circled '1') lists several articles. The top article is "Expression of NO scavenging hemoglobin is involved in the timing of bolting in *Arabidopsis thaliana*" by Kim Henrik Hebelstrup. The main content area shows a preview of this article from the journal *PLANTA*. The preview includes the title, authors (Kim Henrik Hebelstrup and Erik Østergaard Jensen), volume information (Volume 227, Number 4, Pages 917-927), and download options for PDF and HTML. An abstract is also visible, starting with "Plants contain three classes of hemoglobin genes of which two, class 1 and class 2, have a structure similar to classical vertebrate globins. We investigated the effect of silencing the class 1 non-symbiotic hemoglobin gene, *GLB1*, and the effect of overexpression of *GLB1* or the class 2 non-symbiotic hemoglobin gene, *GLB2*, in *Arabidopsis thaliana*."

- 1 Mousing over a “Related Documents” causes a mini-abstract screen to pop up, so researchers can review an item without leaving the original article!

## Export Citations

The screenshot displays a Springer article page for the paper "Effects of the NO donor sodium nitroprusside on oxygen consumption and energetics in rabbit myocardium" by Mark Hinlich and Gerd Hasenfuss. The article is categorized as an "ORIGINAL CONTRIBUTION" and is published in "Basic Research in Cardiology".

The "Export Citation" tool is highlighted with a blue box and a circled "1". It includes the following options:

- Export:**
  - Citation Only
  - Citation and Abstract
- Select Format:**
  - RIS Format
  - Plain Text
- Select Citation Manager:** ProCite (selected)

An orange "EXPORT CITATION" button is located at the bottom of the tool. A blue arrow points from this button to the "EXPORT CITATION" link in the article's navigation bar, which also includes "REFERENCES (47)", "ABOUT", and "Permissions & Reprints".

The article text is partially visible, starting with: "cellular functions: Little is known of the influence of NO on ly oxygen consumption and mechanical parameters of uscles (1 Hz stimulation frequency) were investigated at varying al conditions (37°C; 2.5 mM Ca<sup>2+</sup>) to study the effects of NO on sside (SNP) showed a negative inotropic effect.
